

# PROTECT THE VAST BEAUTY THAT EXISTS AROUND US

[DONATE](#)

## WHY?

It's our home. The ocean is one of the most mysterious places on earth filled with so much diversity that can benefit the earth.

## WHO?

YOU! Make conscious choices to protect the ocean. Be aware of what you put down the drain or the products you purchase. Never forget about the power of the consumer.

## HOW?

Join our team! Volunteer to clean the shores or develop projects to collect debris out in the ocean. Donate to help fund our efforts!

## PLASTIC PROBLEMS

Millions of microbeads from our everyday products bypass filtration systems and end up in the ocean. These beads are like sponges that soak up toxins which are eventually consumed by marine animals.
